WI-FI SERVICES
LEADING TECHNOLOGY SOLUTIONS

Chickasaw Network Services, LLC (CNS) integrates proven technologies with innovative system design and configuration. The systems installed and managed by our experts, experience extremely high uptime with minimal interruption. We work with leading technology and equipment providers to ensure our high-speed internet provides building and campus-wide Wif-Fi solutions that are optimized for performance and value to meet specific customer and facility needs.

WI-FI IMPLEMENTATION

The CNS team has experience designing and deploying wireless data networks in some of the most challenging environments. We have a proven track record of success including servicing a variety of environments, such as school campuses, enterprises, and municipal locations. We have the expertise and experience to ensure all of your expectations are met, from deployment mission critical phase to on-air readiness.

KEY WIRELESS APPLICATIONS

Our team of network experts extends beyond the office.

• Residential/Business Customer Aggregation
• Enterprise/Campus Inter-building Connectivity
• Military Bases and Facilities
• City-wide Municipal Networks
• Anytime/Anywhere Connectivity and Access
• Wireless Backhaul

KEY CUSTOMER SUCCESSES

Our team has managed some of the largest Wi-Fi deployments; our leadership team was responsible for the implementation of Wi-Fi at the largest global fast food restaurant chain. Additionally, we managed a major installation in Manhattan, NY, providing a local carrier with Wi-Fi hotspots throughout the five boroughs.

GUEST WI-FI

CNS provides high reliability, cost-efficient Wi-Fi networks, and Internet access for enterprise office buildings, college campus dormitories, hospitals, and academic facilities. Our customers provide Internet access to their customers and guests via these Wi-Fi networks with pay-to-use and free access options (with or without authentication).

ENGINEERING AND INSTALLATION OF WI-FI NETWORKS

We can handle every aspect of your installation from concept and design to offering on-going support post-installation. Once a Statement of Work is established and approved, our team will work fast to get your system installed, bandwidth provisioned, and network switched on, tested, and fully operational. With tens of thousands of public and private rooms, and offices served, you can have confidence in our ability to deliver for you too.

NETWORK MONITORING

CNS provides help desk services to government and commercial customers supporting customers with nationwide service needs. Our 24/7 help desk team can monitor and manage your Wi-Fi network to ensure maximum efficiency.

WORKING WITH CHICKASAW NETWORK SERVICES

When you work with CNS, not only are you making a decision that ensures the success of your business venture, but you are also working to help preserve an indigenous culture. You are contributing to our mission of providing the resources needed to enhance the lives of the Chickasaw people.
